PROFILE SUMMARY

Software Engineer with 1+ year of hands-on experience in full-stack web development using React, JavaScript, Node.js, Flask, and RESTful APIs. Experienced in working with cloud-backed services such as Firebase and Microsoft Azure Static Web Apps, with basic exposure to Google Cloud Platform (GCP) concepts. Familiar with MySQL, MongoDB, Git, and Agile development practices, and known for a strong learning mindset. A motivated and fast learner, passionate about solving real-world problems through software and eager to contribute to high-quality, user-focused solutions within an innovative engineering team.

EDUCATION

BSc. Engineering (Hons) in Computer Engineering - University Of Sri Jayewardenepura *2021 - 2025*

- Second Class Honours - GPA - 3.2
- Minor in Data Management

Certificate Course in Computer Applications - IHRA, University Of Colombo *2019 - 2020*

- Merit Pass

GCE A/L Examination (2019) - Gurukula College, Kelaniya. *2010 - 2018*

- Combined Maths - A, Chemistry - A, Physics - B (Z score - 1.5873)

WORK EXPERIENCE

Associate Software Engineer Intern - Adveccio (Pvt) Ltd. *MAY 2024 - NOV 2024*

- **Web Application Rewrite:** Migrated a legacy desktop system to a LAN-based web application, implementing JWT authentication, role-based access control, and RESTful APIs to ensure secure and efficient data handling.
- Designed and developed 7+ interactive UI screens using React.js, including dynamic navigation, theme customization, and a secure SQL query interface, while conducting UI/UX design, unit testing, and debugging to deliver a smooth, high-performance user experience.
- **ERP System:** Collaborated within a 6-member Agile team, contributing to report generation components, fixing 5+ critical bugs (including unsaved-data navigation issue), and maintaining code quality using Git/GitHub.
- **Manufacturing Website (R&D)**: Built a web-based tool to analyze the financial impact of manufacturing delays and integrating sales forecasting using linear regression and Chart.js, along with performance optimization.
- Technologies Used - JavaScript, React.js, Bootstrap, Tailwind CSS, Flask, MySQL, REST APIs, Git/GitHub

PROJECTS

Seatify - Real-Time Cafe Occupancy Monitoring Web App (Final Year Project) *NOV 2024 - JULY 2025*

- Initiated and led the concept for project, which uses CCTV feeds and computer vision to monitor seat occupancy in real time, helping customers reduce wasted visits and enabling cafe owners to manage seating and reservations efficiently.
- Developed key features including responsive design, theme integration, secure authentication and role-based access, enhancing customer experience and delivering actionable analytics through interactive charts.
- Selected for the **Final Rounds of NBQSA ICT Awards 2025** under the Tertiary Business Category.
- Tech Stack: React.js, Flask, Tailwind CSS, MySQL, JWT authentication, RESTful APIs

Quizee - Festival Based In-Store Quiz Web App (Individual Project) *NOV 2024 - FEB 2025*

- Built a full-stack web application that enables customers to participate in seasonal quizzes to promote cultural awareness and boost store engagement while enhancing store loyalty.
- Implemented responsive, component-based web interfaces with features for quiz management, timed participation, scoring, and reward tracking, creating an interactive and educational shopping experience.
- Tech Stack: React.js, Flask, Tailwind CSS, MySQL, JWT authentication, RESTful APIs

VidHub - Team-Based Youtube Video Management Platform (Individual Project) *DEC 2025 - PRESENT*

- Built a full-stack web application to solve the problem of fragmented video knowledge sharing within teams by providing a centralized platform for curating, organizing, and managing YouTube video content collaboratively.
- Implemented secure authentication, team-based access control, RESTful APIs for managing videos, ensuring data isolation across teams and a responsive, user-friendly interface for seamless content management.
- Tech Stack: React.js, Flask, Material UI, MongoDB, JWT authentication, RESTful APIs

Interacta - AI-powered dynamic quiz generator (Individual Project) *JULY 2025 - AUG 2025*

- Addressed inefficient manual quiz creation by developing a web app that generates AI-based quizzes for products from product descriptions or any domain, improving interactive customer engagement.
- Implemented 4 responsive user-friendly interfaces, integrated RESTful APIs, and added gamification elements to enhance product promotion and user experience with LLM API integration.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap, LLM API Integration, RESTful APIs

TECHNICAL SKILLS

Skills: JavaScript (ES6+), C#, Python, HTML, CSS, React.js, Node.js, Flask, SQL, MongoDB, MySQL, Bootstrap, Tailwind CSS, REST API

Tools and Platforms - Git/GitHub, Postman, Figma

Cloud - Firebase, Google Cloud Platform (GCP – basic), Microsoft Azure (Static Web Apps)

EXTRA-CURRICULAR ACTIVITIES

Graphic Designer *2022 - 2025*

- CENSOC Computer Engineering Society & Technical Sub-Committee - FOE, USJ

Deputy Head Prefect *2017/2018*

- Gurukula College, Kelaniya

Secretary - Science Society *2017/2018*

- Gurukula College, Kelaniya

House Captain - Inter House Sports Meet *2017/2018*

- Gurukula College, Kelaniya

CERTIFICATIONS

- Programming with JavaScript - Meta (Coursera) *DEC 2025*
- Introduction to Front-End Development - Meta (Coursera) *JULY 2024*
- React Basics - Meta (Coursera) *OCT 2025*
- MySQL Explorer Badge - Oracle *MAY 2025*
- Getting Started with Git and GitHub - IBM (Coursera) *SEPT 2025*
- Python for Beginners - University of Moratuwa *JULY 2022*

SOFT SKILLS

Leadership, Team Collaboration, Quick Learning, Adaptability, Effective Communication, Creative Problem Solving

INTERESTS

UI/UX, Painting, Reading, Graphic Designing, Coding, Yoga, Meditation
